

American Roulette

Welcome to Platinum Casino.

We have written these rules in order to help you when you play in our casino. Don't hesitate to ask anyone of our gaming staff if you are not sure of anything.

American Roulette is a fast, easy and fun game to play.

When you wish to play, you will need to buy your chips from the dealer at the Roulette table or from the cashier desk. The dealer will give you chips all the same colour and these chips are only for you to use at the table you purchased them from. Any other players will have their own unique colour too.

Your colour chips are not valid on the other tables so if you wish to leave the table the colour chips will need to be returned to the dealer who will exchange them for chips of a cash value. The cash value chips can be used to purchase colour chips from another Roulette table or may be used to play with at the card games.

When you want to cash in your winnings the cash value chips are exchanged for cash money only at the cash desk located within the casino.

“Zero Spiel” is a section of the wheel witch covers a few numbers of the “Voisin Du Zero” as follows:

0-3 split, 12-15 split, 26 straight-up, 32-35 split

This is a four-piece bet. If the winning number is on of the afore-mentioned, the dealer will place the bet and it will be paid accordingly.

Note the following “Call Bets” require a lager minimum amount of chips to play and are placed by the dealer.

If a player does not announce correctly his call bets the casino accept the maximum for the call bets according to the given money.

The chips over the maximum amount allowed for a certain position will be moved on the next descending position up to the maximum for each one.

All bets will be paid for the position they are in the moment the ball fall down. The responsibility for the bets is on the players.
